

JAVA MULTYTHREADING TASK

"SESSION 14"

TASK5

THIS TASK IS FOR JAVA MULTYTHREADING

WHAT I HAVE DONE

TASK--->SERVICE...MULTYTHREADING...WHAT IT WILL DO ?....IT WILL SELECT ON ACCOUNT WITH SPECIFIC CATEGORY.....>CATEGORY....ACCOUNTS WITH CATEGORY 1001.....>DEBIT EACH ACCOUNT ON THE 1001 CATEGORY TO A SPECIFIC ACCOUNTSPECIFIC ACCOUNT>100021

1-CODE

```
package com.mbsc;
```

```
import java.util.List;
```

```
import com.temenos.api.TStructure;
```

```
import com.temenos.t24.api.complex.eb.servicehook.ServiceData;
```

```
import com.temenos.t24.api.complex.eb.servicehook.TransactionData;
```

```
import com.temenos.t24.api.hook.system.ServiceLifecycle;
```

```
import com.temenos.t24.api.records.fundstransfer.FundsTransferRecord;
```

```
import com.temenos.t24.api.system.DataAccess;
```

```
public class MbscBatch2 extends ServiceLifecycle {
```

```
    @Override
```

```
    public List<String> getIds(ServiceData serviceData, List<String> controllist) {
```

```
        DataAccess da = new DataAccess(this);
```

```
        List<String> idsList = da.selectRecords(
```

```
            "",
```

```

        "ACCOUNT",
        "",
        "WITH CATEGORY EQ 1001 AND CURRENCY EQ USD"
    );
    return idsList;
}

```

@Override

```

public void postUpdateRequest(
    String id,
    ServiceData serviceData,
    String controlItem,
    List<TransactionData> transactionData,
    List<TStructure> records) {

    FundsTransferRecord ftRec = new FundsTransferRecord();
    ftRec.setTransactionType("AC");
    ftRec.setDebitAcctNo(id);
    ftRec.setDebitCurrency("USD");
    ftRec.setDebitAmount("10");
    ftRec.setCreditAcctNo("100021");

    TransactionData td = new TransactionData();
    td.setFunction("INPUT");
    td.setNumberOfAuthoriser("0");
    td.setSourceId("BULK.OFS");
}

```

```

        td.setVersionId("FUNDS.TRANSFER,BATCH2");

        transactionData.add(td);
        records.add(ftRec.toStructure());
    }
}

```

---→ I created MbscBatch2 extending ServiceLifecycle. The getIds() method selects all accounts with category 1001 and currency USD. The service runs across multiple threads (configured through the TSA workload profile), so accounts are processed concurrently instead of one by one.

For every account returned, postUpdateRequest() builds an FT record that debits 10 USD from the account and credits it to account 100021, then sends it through OFS (BULK.OFS, version FUNDS.TRANSFER,BATCH2).

THE REC :
